Half Your Living Without Money Cost

A right or wrong start in 1917 will make or break most farmers in the South. We are all feeling this. This war in Europe puts the price of such necessities as food and clothing in the future with pay down to clearness.

The sure and certain increase in cotton acreage means lower cotton prices next fall. Cost of all food and grain products is high, so high that no one can afford to buy and expect to pay out with cotton.

It's a time above all others to play safe; to produce all possible food, grain and forage supplies on your own acres; to cut down the store bill.

A good piece of garden ground, rightly planted, rightly tended and kept planted the year round, can be made to pay half your living. It will save you more money than you made on the best five acres of cotton you ever grew!

Hastings' 1917 Seed Book tells all about the right kind of a money saving garden and the vegetables to put in it. It tells about the field crops as well and shows you the clear road to real farm prosperity. It's Free. Send for it today to H. G. HASTINGS CO., Atlanta, Ga.—Adv't.

The newspaper is admitted to be the best and the least expensive medium there is to get buyer and seller together.

He sold to one man in Chattanooga 200 cases Red Wing Grape Juice amounting to over \$900 and Red Wing Apple Cider amounting to over \$100; the whole order to \$24.95. Some soft drinks that! Those who know Mr. Renfro best are not surprised at his success for he is one of those men who put the best there is in him to the front all the time. Such energy and push as he possesses carries no dictionary with the word "fail" in it; that is not a part of his program.

The general verdict now is that the roads have never been worse than at this time, especially is this true of the freshly graded roads. The Mair street of Crossville is probably as bad if not the worst section in the county. But that should be no surprise to any one when it is remembered that the street was graded only a few weeks before winter set in. Our streets will never be other than a mudhole until our people rise to the plain duty that is before us and have the sidewalks widened, brought to a common grade, concrete gutters put in and the street concreted from gutter to gutter. It will require some expenditure of money to do that, but it is about the only way out. Enough money has been wasted thus far to have fixed at least one block in a most substantial manner. When will our people wake up to the duty before them?
